

TESTING

Testing specialty is based on a **QA 360 vision** performing all kinds of services for the **quality assurance of the software product**.

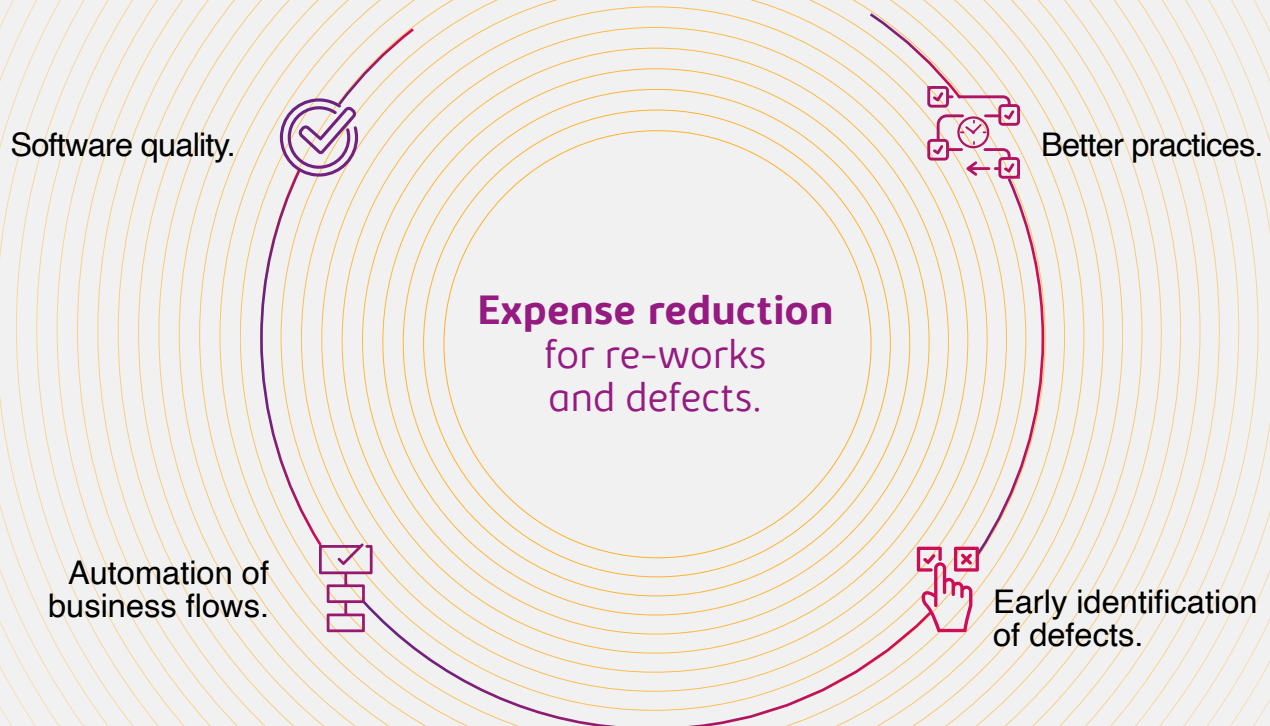

We perform different services for end-to-end quality assurance in the life cycle of a software product. Supporting our work in methodological frameworks worldwide:
TMMi® and ISTQB®.

Additionally, we have a static and dynamic testing approach, as well as multi-specialty and technology support.

Our hallmark

The PRAXIS Software Quality (Testing) specialty becomes a **technological ally** that adds value to those companies that want to reduce and even eliminate expenses for reworking defects not detected on time.

In addition, we have a **specialized and multidisciplinary team** to face any testing challenge regardless of the platform our clients handle.

Services

- **QA Factory:** Platform of test specialists with different experiences and tools, covering all kinds of tests; static and dynamic, on different technological platforms.
- **Projects:** Partial or full participation in the life cycles of projects.
- **ISQTB® and TMMi® Certification Courses:** We have certified and experienced staff to train your professionals in the best testing practices.
- **Test Process Improvement:** We help align your test processes to industry best practices and the world's most widely used test maturity model.
- **TaaS Services:** Test products and tools deployed in the cloud, to support remote testing needs.
- **Specialized Consulting:** Consultants with tailored characteristics, helping our clients' needs and supporting their quality objectives.
- **TMMi® Consulting:** We carry out diagnoses to evaluate how mature the company is in terms of software testing, and we align its processes to the maturity model that best suits your situation.

Benefits

- Early identification of defects, product hazards, and testing approach to risk.
- As well as the automation of business flows to reduce testing times by up to 100%.
- We help certify testing professionals before the ISTQB® and TMMi® bodies.
- Certified Personnel in the methodological frameworks and best practices.
- Processes certified and aligned with the TMMi® maturity model.
- Integration to agile methodologies and continuous tests.

At PRAXIS, we have been transforming the **technological, digital, intelligent and agile solutions** of companies for 30 years. With more than 1,300 employees, in more than 10 countries around the world.
